

# Mayee Water Fast Facts

---

Our mission is to provide businesses and homes with sustainable drinking water, that is not only great for health but also contributes to saving our beautiful planet.

## Basic Information

Our Mayee Water dispensers create pure, fresh, mineralised drinking water directly from the air you breath using clever air-to-water technology! This means no more single plastic use or waiting on water deliveries!

## Mayee Facts

---

1.

Convenience - No need for anymore single plastic bottles, waiting on water deliveries or heavy lifting. Just plug your Mayee Water dispenser in and you are good to go. So good in fact, that your machine can produce up to 24 litres per day depending on humidity levels.

---

2.

Health - At Mayee Water we believe that health is wealth, thats why our water is free from nasty chemicals and micro plastics plus we are PH balanced with added essential minerals! Oh yeah ... and a Mayee Water dispenser can also help purify and dehumidify the air.

---

3.

Environment - By choosing Mayee air-to-water technology you are contributing to plastic reduction. Most plastic ends up polluting our oceans & lands, causing devastating effects on wildlife & eco systems. Did you know that the majority of baby sea turtles have plastic in their stomachs?

---

## Our message to you

It's more important than ever for people to come together and do their bit for the environment and it's always important to make steps towards better health. At Mayee Water we believe that small positive acts, multiplied by many can changed the world! Join us and become part of the change by subscribing today!
